

**Course title:** Green Economy & Sustainable Energy

**Course Description:** Green economy is at the center of the attention of policy-makers, stakeholders, and business agents as well as local and federal governments from around the world. The number of countries developing and implementing green economy strategies is growing. This course provides clear, concise and up-to-date information for anybody interested in obtaining a general understanding about inclusive green economies. The course enables learners to familiarize themselves with the rationale and core concepts guiding an inclusive green economy. It discusses both opportunities and challenges at global and national level to achieve low-carbon, resource efficient and socially inclusive development. The course also focuses on how to transform the challenges of Green Economy to opportunities as Sustainable Energy.

**Course Learning Outcome**

- Describe the rationale and core concepts for realizing an inclusive green economy against business-as-usual practices
- Identify enabling conditions for greening national economies, using sustainable energy as points of opportunities.
- Outline principal opportunities and challenges in key sectors
- Provide examples of national strategies and planning to advance an inclusive green economy
- Distinguish local, federal and international frameworks and initiatives in support of an inclusive green economy and sustainable energy
- Understanding the United Nation's Sustainable Development Goals, objectives and targets related to Green Economy and Sustainable Energy, and the way forward.
- Formulating necessary policies, legislations and standards to ensure the compliance with Local, Federal as well as International requirements.
